

Team 08

Meeting Minutes September 10, 2020

CSCI-P465/565 (Software Engineering I)

Meeting Attendees

Zachary Zirin
Joshua Baker
Devansh Jain

General Meeting Info

Meeting Purpose: Introduction to the team and discuss the project themes

Start Time: 07:45 PM

Stop Time: 08:30 PM

New Business

Before this meeting, after the teams were announced, the team created a Slack Channel to schedule a quick meeting. The meeting began with a quick introduction by all the team members, and then the project themes and their pros and cons were discussed. Team also spent some time discussing the technology stack, and in that team members wanted to stick to the common strengths.

Since everyone on the team had spent some time on brainstorming over themes, the members shared their preferences and the reason why they chose them.

Josh

#7: Delivery Management System (online delivery has grown in past 7-8 months)

#8: Learning Management System (online learning has grown in past 7-8 months and will continue to grow in coming years)

#10: Booking Management System

Zack

#9: Wellness Tracking System (anticipated new big thing are the applications which can help people stay fit and monitor their health)

#6: Job Portal

#2: Rental & Services Management System

Devansh

#2: Rental & Services Management System (Idea of making a car service application, schedule, pickup and deliver, vendors can register and offer their services to customer)

#10: Booking Management System

#9: Wellness Tracking System

Leo

#10: Booking Management System

#2: Rental & Services Management System

#7: Delivery Management System

Stack Selection (not limited to)

Front End: ReactJS (most of the team is comfortable using React)

Back End: Python, JAVA, C++ (open to other options)

Database: SQL, PostgreSQL (open to other options)

Decisions Summary:

The top three project themes finalized (in order of preference) are,

#2: Rental & Services Management System (preferably Idea presented by Devansh)

#7: Delivery Management System

#10: Booking Management System

The final decision over technology stack is subject to change depending upon the project specifics and requirements.

New Action Items:

Setup GitHub Repository

Setup JIRA, Confluence
