Meeting Minutes October 20, 2020

CSCI-P465/565 (Software Engineering I)

Meeting Attendees

Gopi Kiran (Primary Customer)

Zachary Zirin

Leo Chen

Joshua Baker

Devansh Jain

General Meeting Info

Meeting Purpose: The aim of this meeting was to present the customers with progress that has been made during Sprint 02 of the project and also discuss the goals of the application for Sprint 03.

Start Time: 02:00 PM

Stop Time: 02:30 PM

New Business

The meeting was scheduled by the primary customer, and was aimed towards going over and discussing the team's performance in the past sprint and also deciding the goals for the upcoming sprint. The team presented the work that it was able to accomplish within the duration of Sprint 02.

As clarified in the project plan document, the aim for Sprint 02 was to be able to help all users create, update and view their profile in our database on the backend, allow owners to add, update and view their item to listing. All these goals were met as far as the backend is considered and we were able to implement view specific functionality for the renters and the owners.

Refine report ▾

The team was successfully able to accomplish these tasks and then presented their work during the demo to the customers. The project was already deployed in the production environment and the demo was done in that environment.

The features that were tested during the demo were,

1. Create, Update, View Profile Feature
2. Add, Update, View Item to Listing Feature
3. Search Feature
4. Add, View Reviews (Backend)
5. Private View of the items Page
6. Other pages that have been setup as a part of skeleton for the application.

The customers also shared few ideas about how the team should start thinking about the additional features. The team was advised to keep up the momentum they have gained in the past sprint and build upon that during the Sprint 03 to accomplish more than just 1 feature and aim to complete at least 4 features by the end of 3rd sprint.

Decisions Summary:

The Create Profile, Items and Review Items of the application was presented to the customer.

The final decision over additional features is subject to change depending upon the team's decision.
